PROFESSIONAL PROFILE

Computer Science graduate with experience spanning freelance virtual assistance, client coordination, product design and testing. Has managed calendars and correspondence, translated business requirements into digital workflows and reviewed deployed interfaces against user needs. Experience includes mobility, invoicing, tax and document platforms, alongside co-founding a student housing marketplace in development. Combines organised delivery, clear communication and practical web-technology skills.

CORE SKILLS

Business and administration: Client correspondence, calendar management, scheduling, travel, email and data entry

Coordination: Project briefs, stakeholder communication, research, review cycles, task tracking and handovers

Product and applications: Requirements review, product testing, usability feedback, workflow and responsive interface design

Tools and technology: Figma, Google Workspace, Microsoft Office, Trello, Asana, Canva, HTML, CSS, JavaScript, React, Next.js, Git/GitHub, Supabase and VS Code

PROFESSIONAL EXPERIENCE

Junior Product Designer
Apr 2026 - Present

Entryza | Ticketing and mobility platform serving Nigeria and Cameroon

- Design responsive mobile interfaces for a ticketing and mobility platform serving users in Nigeria and Cameroon.
- Contribute onboarding flows, event and music cards, calls to action and reusable UI components.
- Coordinate feedback and design changes within an evolving design system to support consistent developer handoff.

Freelance Product Designer
2024 - Present

Vetra Studio | Client projects across real estate, e-commerce and SaaS

- Manage client correspondence, project briefs, feedback rounds and final handovers for startups and small businesses.
- Translate business objectives into product concepts, user flows and responsive web and mobile interfaces.
- Deliver work across real estate, e-commerce and SaaS, preparing developer-ready designs and communicating revisions.

Junior Designer
Apr 2025 - Jul 2025

Trevidia | B2B SaaS platform for invoicing, billing and team workflows

- Contributed to responsive invoicing and billing workflows, invoice templates and dashboards for a B2B SaaS platform.
- Designed role-based flows and collaboration features covering comments, tags, attachments and feedback.
- Standardised spacing, auto-layout and component behaviour across desktop, tablet and mobile designs.

PROFESSIONAL EXPERIENCE CONTINUED

Freelance Virtual Assistant — Sep 2024 - Jan 2025

Independent clients | Remote administrative and client support

- Managed calendars, scheduled meetings and organised travel arrangements for remote clients.
- Handled email management, data entry and social media updates to support routine client workflows.
- Organised assignments and tracked progress using Trello and Asana.

Product Tester — 2024 - Apr 2025

Phcworkhub | Review of deployed product interfaces and user workflows

- Tested deployed interfaces against user requirements and identified design inconsistencies.
- Provided actionable feedback to support revisions and improve product usability.

Lead UI/UX Designer — Aug 2024 - Feb 2025

Phcworkhub | Tax automation, business documents and estate paperwork

- Led interface design for tax automation, business documents and estate paperwork, working with stakeholders on scope, timelines and deliverables.
- Structured onboarding, multi-step forms, document generation and dashboard navigation into coherent workflows.
- Built reusable components for signatures, uploads and validation, with responsive layouts and developer handovers.

LEADERSHIP AND ENTREPRENEURSHIP

Co-Founder and Lead Designer — 2025 - Present

CampusCrib | Student housing marketplace in development

- Help define product priorities for a student housing marketplace focused on verified off-campus accommodation.
- Develop the product concept, interface system and front-end architecture; prepare stakeholder and investor materials.

SELECTED PROJECTS

The Bookshelf App | Reading platform

- Designed school and individual user journeys covering onboarding, browsing, cart, checkout and subscriptions.

Felx | Car rental platform

- Designed availability, pick-up and return scheduling, checkout, confirmation and receipt interfaces.

Frozen In Time | Accessories brand

- Led branding, website development, payment integration and go-to-market planning for a crochet and resin brand.

EDUCATION

B.Sc. Computer Science | Dominican University, Ibadan | 2025

Final-year project: Facial Expression Recognition System

Relevant coursework: Software Engineering, Database Systems, Web Development and Human-Computer Interaction
